Urological Cancers MCN Objectives

- Develop a Regional Renal Cancer MDT
- Support the implementation of actions proposed following the Regional Review of Urology Report
- Support the ongoing development of the Regional Radical Prostatectomy Service
- Investigate the potential to develop a Robot Assisted Laparoscopic Partial Nephrectomy Service

Actions

- Complete engagement process with stakeholders
- Develop formal proposal detailing clinical case for submission to RCAG
- Implement recommendations to establish MDT, following RCAG approval
- Monitor progress of regional service at Advisory Board Meetings
- Convene a regional meeting to review the Health Technology Assessment and test business planning assumptions
- Contribute to the review of the early outcome data from the radical prostatectomy service across Scotland, and agree any focussed WoS actions required.

Outcomes

- Improved efficacy of MDT discussions, leading to an improvement in outcomes and patient experience.
- Actions rolled out to ensure equity of care across the WoS
- Actions taken forward to optimise the outcomes of the Regional Radical Prostatectomy Service
- Next steps agreed by the Regional Cancer Advisory Group and work taken forward as directed.
